

Kiyokazu Nakajima, MD, PhD, FACS  
Short CV, as of Feb 2022

Kiyokazu Nakajima, MD, PhD, FACS

Dr. Kiyokazu Nakajima

Professor

Department of Next Generation Endoscopic Intervention

Department of Gastroenterological Surgery

Graduate School of Medicine, Osaka University

Dr. Nakajima received his MD in 1992, and PhD degrees in 1999 from Osaka University and then went to Weill Medical College of Cornell University for 2 years, where he was a postdoctoral associate in surgery.

Dr. Nakajima is one of the nation's leading experts in minimally invasive surgery, especially for inflammatory bowel diseases, functional GI diseases, and GI stromal tumors. In 2008, he was recognized not only as performing Japan's first human Natural Orifice Translumenal Endoscopic Surgery (NOTES) series for therapeutic purpose, but also world's first partial gastrectomy using NOTES technique. He has published more than 15 textbook chapters, 38 top-author original articles in peer-reviewed journals and edited/co-edited 7 books. He has been invited to serve as a faculty member for laparoscopic surgery courses at national and international meetings.

Reflecting his strong interest and expertise on innovation of surgical techniques and development of new devices for laparoscopic and endoluminal procedures, Dr. Nakajima has established an academia-industry consortium called "ENGINE" (E<sub>n</sub>deavor for N<sub>e</sub>xt G<sub>e</sub>neration of I<sub>n</sub>terventional E<sub>n</sub>doscopy) and has served as PI since 2009. He has gained over 6.8 million USD research grants from Japanese government in the last 13 years. He has held 158 domestic and international patents and 14 commercialized items.

He has received several major awards from domestic/international medical societies and from Ministries. Recently he was awarded as "Ohgami Memorial Award" from Japan Society for Endoscopic Surgeons (JSES).
